

DEEPAK P

SENIOR SOFTWARE ENGINEER

deepakgopalakrishnan94@gmail.com | +91-9400382510 | deepakpallath.github.io/Deepak | linkedin.com/in/deepakpallath

Senior Software Engineer with 7+ years of experience delivering multi-tenant enterprise applications across healthcare, logistics, and renewable energy. Leads product development, GenAI integration, and cloud migration initiatives, with a strong foundation in C#, Python, .NET, JavaScript, API design, performance optimization, and team mentoring.

SKILLS

- Backend:** C#, .NET, Python, Asp.Net Core, FastAPI, SQL, REST APIs, gRPC, Unit Testing, TDD, Microservices Architecture
- Frontend:** TypeScript, JavaScript, Node.js, ES6, React, HTML, CSS
- AI:** GenAI Integrations, LLMs, AI agents, LangGraph, Ollama
- Cloud and DevOps:** Microsoft Azure, Docker, Kubernetes, Git, Visual Studio, VS Code, Codex, Cursor, Azure DevOps
- Core CS:** System Design, Data Structures and Algorithms, OOP, Design Patterns, SOLID Principles, Distributed Systems

PROFESSIONAL EXPERIENCE

Senior Member Technical Staff

Oracle Health Pvt Ltd | Bengaluru | 09/2025 - Present

- Lead developer for multi-tenant enterprise PowerTrials applications - Protocol Office Manager, Patient Protocol Manager, and Research Organizer - supporting clinical study creation, management, and execution.
- Delivered Sweden rollout, addressing market compliance requirements and onboarding Swedish clients; supported a growing client pipeline with an estimated 15% potential revenue uplift.
- Led delivery of GenAI capabilities: Summary Options for clinical-trial summaries and eligibility scoring to identify potential studies and patient candidates for enrollment.
- Delivered client onboarding and tailored enhancements for healthcare organizations across the US, Canada, and UK.
- Tech Stack:** C#, .NET, Python, JavaScript, SQL, OCI, GenAI, LLM, Test Driven Development

Senior Software Engineer – Fullstack

WiseTech Global Pvt Ltd | Bengaluru | 03/2022 – 08/2025

- Led the design and development of the Driver API (Backend) and Driver App (Web and Mobile), ensuring scalability, reliability and seamless integration. Expanded team capacity by mentoring and onboarding new hires, growing the team from 2 to 8 developers, and improving collaboration and delivery efficiency.
- Built GeolocationStorage background service from scratch using C# and .NET 8, enabling high availability geolocation data storage and retrieval.
- Improved API performance by transitioning position tracking services from JSON to gRPC, optimizing geolocation updates and reducing latency. Enhanced system performance by implementing batching and caching mechanisms across multiple services, resulting in significant performance gains for the Driver product.
- Diagnosed and resolved bottlenecks in the DriverBusinessRules project, increasing processing efficiency and reducing response times for key business operations.
- Tech Stack:** C#, .NET, Python, React, TypeScript, JavaScript, SQL, Azure, Entity Framework, Test Driven Development

Software Engineer – Fullstack

Siemens Gamesa Renewable Energy Pvt Ltd | Bengaluru | 07/2019 – 03/2022

- Project: Track and Trace Tools and Equipment** - Built end-to-end solution for tracking and maintaining equipment for SGRE production plants, achieving €600k cost savings in FY’21 and potential savings of €100k/month globally.
- Developed features such as equipment position tracking, movement animations, AAD authentication, file upload/validation, real-time messaging, and integrations with Azure Search and Applnsights.
- Project: Super Smart Loads and Design** - Developed features for the app that enables SGRE engineers and customers to validate project site climatic data and interact via real-time chat.
- Tech Stack:** C#, .NET, Python, React, JavaScript, SQL, Azure, Entity Framework, Test Driven Development

KEY ACHIEVEMENTS

- Recognized and rewarded for taking ownership of the Driver Project and driving its success.
- Received Talent Award and Best Team Award at the organization level for contributions to Track and Trace project.
- Published IEEE Paper: “A Novel Bi-Directional Converter Algorithm for Electric Vehicle to Grid Applications.”

EDUCATION

M.Tech | Electrical & Electronics Engineering | National Institute of Technology Karnataka | CGPA: 8.43 | 2017 – 2019

B.Tech | Electrical & Electronics Engineering | Government Engineering College Thrissur | CGPA: 7.93 | 2012 – 2016

HSC | SVVB, Perinthalmanna | 93.2% | 2011 – 2012

PERSONAL PROJECTS

- Invo-Eaze:** App to manage inventory, logistics, invoice and sales, integrated with real-time tracking and WhatsApp notifications.
- SmartHome:** Application to track and manage home appliances and power consumption.
- Personal Portfolio Website:** <https://deepakpallath.github.io/Personal-Website>
